

Nº	Description	Screenshot of the bug (not a link)	How it should look (screenshot)	Comment		
1	The navigation menu is misaligned on the phone			The shift is 50 pixels vertically. Mobile S - 320px.		
2	The homepage is misaligned on the desktop.			The shift is 50 pixels to the right horizontally. Google Chrome Version 129.0.6668.100		
3	The homepage on mobile phones is completely misaligned and displays incorrectly.			I tried switching between devices in DevTools as well as using a real device (iPhone 13 Pro). The result is similar everywhere — the layout of the homepage is displayed incorrectly.		
4	The homepage is misaligned on the desktop.			The shift when opening the homepage in Mozilla is 41 pixels to the right horizontally. Version Firefox 131.0.3
